Re: Protocol # AMP001, site 112/Hernandez

Dear Patrick,

On behalf of Health Decisions, I would like to express our appreciation for the work your site's study team has done on the Evofem study. Specifically I would like to recognize the efforts of Rosa Quiceno. Your site was one of the first sites initiated on the Evofem Protocol. Your site not only exceeded enrollment expectations but Ms. Quiceno has ensured that it has been conducted smoothly and cohesively throughout the course of the study (almost two years).

Rosa is a highly experienced and organized professional. During my frequent monitoring visits to your site or working remotely, I found Rosa a pleasure to work with: she was available as needed, all documentation was well organized and thorough, any questions were addressed promptly and queries and/or issues were resolved during the visit prior to my departure or immediately thereafter.

Ms. Quiceno's hard work, attention to detail and dedication to the study has contributed to its' success at your site. She has been valuable asset to our study and I am very appreciative all of her time and efforts put into our trial.

Best Regards,

Dayna Roberson  
Clinical Research Associate II

cc: Rosa Quiceno
