RE: Protocol CBAF312A2130 – Site 1001: PI – Peter Winkle, MD

Dear Mr. McLaughlin,

I would like to take this opportunity to express my appreciation to Gaby Huizar, Regulatory Specialist, for her contributions thus far for the above referenced Novartis program.

Regulatory activities are a crucial part of any clinical research program and Gaby has demonstrated her commitment to excellence and professionalism. Gaby is dependable, conscientious and exhibits excellent communication skills with the Sponsor and MedSource study team. Gaby is very personable and has formed deep professional relationships with study IRB, which in turn has translated to prompt approval times and responses. The regulatory binders for the study are also current, comprehensive and well organized. Gaby also ensures that the study CRAs are copied on Regulatory items sent to and from the Sponsor and IRB.

I am impressed her dedication to the program and her strong skill set. It is always a pleasure with work with Gaby and I look forward to continue to collaborate with her on this and future projects.

Warm regards,

Tammy Yi, CCRA
Sr. Clinical Research Associate Consultant
MedSource
