Novartis Study CBPS804A2203: Pramod and Sharda Vora

Dear Patrick,

I'd like to provide feedback on my experience of working with Sharda and Pramod Vora since they took over as study coordinators on the BPS804A2203 study.

Sharda and Pramod took over a challenging study at short notice from the previous coordinator. They have got themselves up to speed very quickly on the protocol and have since done an excellent job of keeping me informed of the subjects status. They are always quick to respond to questions or requests from Novartis and they are also quick to seek feedback from myself or the medical advisor if they have any questions or doubts about a subject or any aspects of study conduct.

I appreciate both Sharda and Pramod's attention to detail and positive attitude and would be pleased to work with them on future projects.

Best regards,

Sarah Hemsley
