Re: Novo Nordisk Clinical Trial NN9068-3912

Dear Mr. Patrick McLaughlin:

I have had the extreme pleasure to build an excellent working relationship with Anna Parker DCN, MS, RD, CDE. Anna is an outstanding clinical research coordinator who has been instrumental in the success of this trial. Her level of dedication to her patients and the trial is commendable. Her knowledge on source documentation requirements and her overall work ethic is impeccable.

She is excellent with time management, organizational skills and always punctual with follow up. She is knowledgeable on the protocol and fantastic with source documentation and data entry. Anna ensures all study documents are always well-maintained and has a great attention to detail.

She is truly an asset to Anaheim Clinical Research and is an excellent clinical research coordinator.

Kind Regards,

Satra Carroll, MA
Senior Clinical Research Associate
Novo Nordisk, Inc.
