

RE: PTL-1000-068

December 18, 2013

Dear Patrick,

On behalf of the entire team at Obalon Therapeutics, I would like to take a moment to express our sincere gratitude for all of the dedication and hard work that the entire ACT team has demonstrated throughout our study.

Your willingness to arrange for initial introductions with Dr. Riff and Dr. Winkle were exceptionally helpful and led to a very productive study. Gaby Huizar and Kristina Kim were also very helpful and efficient in helping us to implement regulatory documentation and contracts in a very expeditious manner.

Mark Gonzalez and the rest of the patient recruitment team did a truly fabulous job hosting patient information sessions which led to very well screened study subjects. I wish that all of our study sites had the patient recruitment skills and capabilities that your site made look so easy.

Adam Lopez has consistently demonstrated his leadership organizing all of the study activities and the rest of the team who have all done a truly exceptional job to ensure the study is executed with strict adherence to the protocol and with a clear focus on patient safety.

Finally, I would again like to express our appreciation and gratitude to Dr. Riff, Dr. Winkle and the rest of the medical team who have also demonstrated a commitment to fulfil their duties as investigators in the study and to help us execute the study with diligence and with a very aggressive timeline.

The team at Obalon is fortunate to have Anaheim Clinical Trials as a research partner and we look forward to continued collaborations in the future.

Very Sincerely,

Alan Marcovecchio
Vice President of Clinical Affairs
