Reference - Letter of appreciation

Dear Patrick,

I hope, things are fine and under control with you. This letter is to appreciate continued participation and successful completion of various clinical trials your research company has been performing for many years for Pfizer, INC.

I may have conducted many PSVs, SIVs, and routine monitoring visits for different Pfizer studies at Anaheim Clinical Trials, but I do remember the SIV performed for Pfizer B1971016 study on May 15<sup>th</sup> 2013.

Sanjay Chaudhari coordinated my SIV, making sure that all site personnel, participating in the study were present and site specific documents available for my review. Sanjay asked me plenty of protocol specific questions and issues he and his study team might face in the conduct of the study and ensured to obtain resolution to all questions and issues.

I noticed that Sanjay is highly knowledgeable and dedicated. Sanjay has excellent communication skills and interaction with the project team and tries to reach perfection.

Patrick, at the end of the SIV I was pleasantly relaxed thinking that Sanjay and your research team will meet assigned goal, and look for increased challenges and demands.

Sincerely,

**Arvind Churi
